

Bigger market. Bigger savings.

MISO SERVICE AREA

In 2013, Entergy joined one of the largest regional transmission organizations in order to gain access to a larger power market. MISO manages the flow of power on the North American grid and operates electricity markets spanning from Canada to the Gulf of Mexico.

This partnership allows Entergy Texas to purchase electricity when market prices fall below our production costs. We deliver those savings right to our customers – **\$52 million** in the first three years.

Clean, affordable energy is crucial for the future of Texas. Our partnership with MISO will help Entergy Texas keep our rates low.
