ROASTING A TURKEY

1. Salt inside of turkey (1/2 teaspoon per pound).
2. Stuff turkey just before roasting.
3. Fill neck cavity loosely with stuffing and fasten neck skin to back bone with skewer.
4. Fill cavity lightly, because stuffing tends to expand. Allow 1 cup stuffing per pound.
5. Truss turkey and grease skin thoroughly with shortening or oil.
6. Place on rack in shallow pan, breast up. Do not add water or cover pan.
7. Place in preheated oven set at 325°F.
8. If desired, baste or brush occasionally with pan drippings.
9. Cover with loose tent of aluminum foil, or a fat-moistened cloth over legs and breast to prevent excessive browning.
10. When turkey is 2/3 done, cut the cord or band of skin at tail to release the legs and permit the heat to reach the heavy-meat part.

TO TEST FOR DONENESS

A thermometer is always recommended for accurate test for doneness. It should be placed in the center of inside of muscle, or the thickest part of the breast. Roast turkey until the thermometer registers 180 to 185°F.

If the bird is stuffed, the point of the thermometer should be placed in the center of the stuffing, and register 165°F.

If you do not have a thermometer, test for doneness by moving the drumstick up and down. Turkey is done if the leg joint gives readily or breaks. The fleshy part of the drumstick should feel soft when pressed between protected fingers.

COOKING TURKEY IN ALUMINUM FOIL

TO WRAP THE TURKEY - Place the trussed thawed turkey in center of the aluminum foil (18 inch heavy duty or 2 thicknesses of standard wrap). Brush with melted shortening or butter and season with salt and pepper. Bring one side of the foil down snugly at each end of the turkey. Then bring ends up, to prevent the drippings from escaping from the top and into the pan.

TO ROAST - Place the wrapped turkey, breast up, in bottom of a shallow pan. Place in a preheated 450°F oven and cook according to chart below. Add 20 to 30 minutes additional time for stuffed turkeys over 10 pounds.

TO BROWN - During last 15 to 30 minutes of cooking time, turn foil away from the turkey to the edge of the pan. Reserve drippings for gravy.
