

At Entergy, we are focused on growing a world-class energy business that creates sustainable value for all our stakeholders. Achieving this objective requires us to continually assess every aspect of our business, from how we innovate to how we invest to how we create a high-performance workplace.

Our industry is changing and Entergy is entering an exciting period of growth opportunities as we prepare for the future. To take the next step on our journey, we are building the premier utility. Entergy employees approach their work each day with a clear objective, to continuously improve our business.

What does it take to be the best — to be the premier utility? It takes a powerful purpose with a bright vision, a clear strategy,

and an engaged and resilient workforce. It requires a genuine dedication to sustainability and a strong desire always to be better in a rapidly changing world. Learn more at entergy.com.

Entergy Corporation is an integrated energy company engaged primarily in electric power production and retail distribution operations.

ENTERGY FACTS

 Entergy owns and operates one of the cleanest large-scale generation fleets in the country, with approximately 30,000 megawatts of electric generating capacity. The fleet includes 31 active natural gas, oil, hydroelectric, solar and coal generating facilities, with the capacity to generate nearly 18,500 megawatts of power, with more under construction.

 We serve 2.9 million utility customers in Arkansas, Louisiana, Mississippi and Texas.

 Our annual revenue totals \$11 billion.

 We have approximately 13,600 employees.

 We continue making significant financial investments in our power generation assets.

 Our retail electricity rates are among the lowest of any electric utility in the United States, a key ingredient to sustained growth and driving the economy within our region.

 We believe a diverse workforce committed to personal and professional growth is critical to our success. We place a high value on developing talent to meet current and future needs, giving employees opportunities to grow their careers their way.

 Our generating fleet plays an important role in supporting Entergy's journey to become the premier utility and achieving its three key priorities of customer centricity, continuous improvement and diversity, inclusion and belonging.
