

Building the utility of the future. Ensuring a brighter tomorrow.

At Entergy, we've been planning for the future for more than 100 years. In that time we've experienced a lot of change — from electrifying communities with power generated from sawdust to providing power by splitting atoms or harnessing sunlight and abundant, clean and efficient natural gas.

The next 10 years will offer even more change. We are on the verge of a monumental technology convergence — where reality swiftly catches up to possibility. This tipping point will open a floodgate of inspiration, innovation and invention, brought forth by a workforce with the knowledge, skill and will to deliver sustainable value to our stakeholders.

The utility of the future does much more than keep the lights on and the gas flowing — it solves challenges and fuels a brighter, smarter, more prosperous future for everyone: our customers, employees, owners and the communities we serve. Together, we power life. Learn how at entergy.com.

Entergy Corporation is an integrated energy company engaged primarily in electric power production and retail distribution operations.

Entergy Facts

Entergy owns and operates power plants with approximately 30,000 megawatts of electric generating capacity. The fleet includes 28 active natural gas, coal, oil, hydroelectric and solar facilities with the capacity to generate more than 18,000 megawatts, and nearly 3,000 more under construction.

We serve 2.9 million utility customers in Arkansas, Louisiana, Mississippi and Texas.

Our annual revenue totals approximately \$11 billion.

We have more than 13,000 employees.

We are investing \$2.6 billion in power generation.

Having the lowest retail electricity rates of any utility in the United States drives economic growth within our region, a key ingredient to sustained growth for any utility.

We believe a diverse workforce committed to personal and professional growth is critical to our success. We place a high priority on developing talent to meet current and future needs, giving employees opportunities to grow their careers their way.

In our generating fleet, we have a shared understanding of excellence, value safety over production, focus on fundamentals and engage our employees to be personally accountable.
