

HERBICIDE

Dear Customer:

Date: _____

A representative from Entergy inspected the power lines around your residence today. Some of the trees have grown to the point where they may interfere with the overhead electrical power lines. The trees will need to be treated with herbicide to keep them from growing into the electrical conductors and from getting into primary wires.

A professional brush control service have been contracted by Entergy to perform the work to E.P.A. and Dept. of Agriculture standards. There is no charge for this service.

Please check the appropriate box on the back. Hang the card back on the front door knob and an Entergy representative will pick it up. If the door card is not on the door knob or we do not hear from you, we will proceed with the right-of-way maintenance.

Thank you.

Please treat my tree as necessary.
